

FVG With Smart Money Concepts / Smart Money Printer — 2025 Edition

Professional Trading Indicator for Nifty, Bank Nifty, and Global Markets

■ Product Overview

Product Name: FVG With Smart Money Concepts (SMC) / FVG With Smart Money Printer

Target Audience: New and Professional Traders

Platform: TradingView (Invite-Only Access)

Core Strategy: Smart Money Concepts (SMC) — Fair Value Gaps, Market Structure, and Liquidity

Purpose: Simplify complex price action into clear, visual trading signals — with non-repainting precision.

■■ Core Features & Functional Highlights

■ Trading & Signal Features

- Buy/Sell Signals: Instantly identifies potential entry points with green (Buy) and red (Sell) markers.
- Re-Entry Zones: Highlights re-entry opportunities after price pullbacks for position scaling.
- Support & Resistance Detection: Automatically plots major structure highs/lows (dotted lines).
- Fair Value Gap (FVG) Recognition: Detects institutional imbalance zones for high-probability setups.
- Trailing Exit (■): Provides trailing exit signals to lock in profits during extended moves.
- Non-Repainting Engine: Once a signal prints, it never changes — ensuring total trust in your analysis.

■■ 2025 Update Highlights

- Dynamic Market Structure Tracking: Auto-adjusts S/R zones and swing levels in real time.
- Real-Time Alerts: Get trade alerts directly via Telegram, Email, or TradingView notifications.
- Multi-Timeframe Smart Zones: Displays higher timeframe zones (e.g., H1, H4) on lower charts.

- Built-in Risk Manager: Suggests ideal Stop Loss (SL) and Take Profit (TP) levels.
- Dark Mode Ready: Clean, optimized visuals for modern charting interfaces.

■ How to Use

■ 1. Long (Buy) Setup

- Wait for a Buy Signal to appear at or near a bullish FVG or support level.
- Confirm with bullish candlestick structure before entering.
- Manage your position using the trailing exit (■) to secure profits.

■ 2. Short (Sell) Setup

- Wait for a Sell or Re-Entry Signal around resistance or a bearish FVG.
- Confirm with bearish price action.
- Exit when the trailing exit triggers or when price fills the FVG zone.

■ 3. Risk Management

- Always apply Stop Loss based on the auto-calculated level.
- Use smaller risk per trade (1–2%) for consistent growth.

■ Market Coverage

The indicator is optimized for all major market types:

- Indian Markets: Nifty, Bank Nifty, FinNifty
- Global Indices & Stocks
- Crypto (BTC/USDT, ETH/USDT)
- Forex Pairs

It's equally effective for Options, Futures, and Scalping setups.

■ Pro Tips for Best Results

- Combine with volume analysis or moving averages for stronger confirmations.
- Use multi-timeframe analysis — e.g., confirm 15M setups on 1H zones.
- Backtest before going live to identify optimal setups for your trading style.

■ Why Traders Love It

“After using the FVG With SMC indicator, my entry precision improved drastically. The BOS + FVG combo gave me confidence to enter Bank Nifty trades early.”

— Rohan S., Mumbai Trader
